

100% Natural and Ready Biodegradable

RECOVERY SHIELD

The revolution you never expected

SELF-CLEANING SYSTEM

CERTIFIED BIODEGRADABLE

100% NATURAL

"EVERY PROGRESS
HAPPENS WHEN
SOMEONE ASKS:
**IS THERE REALLY
NO SOLUTION?"**

Progress is not about adding something new, but eliminating what slows down the future.

For the **first time in the history of plasma and oxy-fuel cutting**, the scrap recovery area beneath the cutting table will no longer be a problem.

3YORS is the world's first 100% Natural and Certified Biodegradable product that prevents scraps, slag, and drippings from sticking to surfaces, recovery drawers, diaphragms, and the walls beneath the cutting table, turning a critical process into a new opportunity for efficiency.

**THE END OF AN ERA.
THE BEGINNING OF THE FUTURE.**

www.3YOTECHNOLOGY.com

APPLICABLE ONLY WITH THE NEW 3YOGUN

Forget difficult, dangerous, and never-ending cleaning operations.

With 3YORS (Recovery Shield), maintenance becomes a rare, quick, and stress-free task, eliminating unnecessary operational waste. Machine downtime?

**BURNED:
AT AN ALL-
TIME LOW.**

**IF YOUR
SYSTEM**
IS ADVANCED,
THE RESULT
IS EVEN MORE
EXTRAORDINARY.

If your system features a vibrating scrap discharge or a conveyor, the effects of 3YORS are amplified: everything flows, cleaning is instantaneous, and work continues without interruptions.

**A MINIMAL INVESTMENT.
A MAXIMUM RESULT.**

For example: a single application of 3YORS – with a total investment of around €370 – protects a 60 m² system for weeks or even months, drastically reducing the need for maintenance.

The result? Continuous operation, minimal cleaning time, and much less frequent maintenance—safer, faster, and significantly less demanding and hazardous for operators.

“Innovation distinguishes between a leader and a follower.” – Steve Jobs

Don't just follow change. Lead it.

3YORS – EVOLUTION STARTS NOW.
